

Srishti Tahlilani - English

The year you trained with us
2020-21

Why are you glad you chose to train with us?

I made the move to teacher training and to England from New Delhi during COVID! The team really supported me with this. We trained in the midst of COVID and the SCITT team ensured that we still received the best training possible. During some challenging times, the team looked after us and were always available to help us and support us in every way possible.

Where has your work life taken you so far?

I trained in some amazing schools and got a job right out of training with a socio-economic disadvantaged school which has given me immense exposure to many interesting students, practices and stories!

What's challenging about teaching?

The most challenging thing is to stay positive and show resilience. There are been days where I just wanted to quit; however, persevering and interacting with students has made it all worth it!

Equally why have you chosen to continue in teaching?

For the young people I teach and inspire (hopefully!). They make it all worth it.

Where do you hope to develop?

I want to keep developing as a teacher and in a few years' time take up leadership roles within my department or school.
